INTERNSHIP OPPORTUNITIES

Spring 2008

Millcreek Gardens LLC is central Ohio's leading wholesale perennial and herb nursery. We currently have several spring and summer internship opportunities for motivated, dependable, and energetic individuals. You will learn many aspects of a wholesale nursery including production, plant culture, shipping procedures, and customer service. We are willing to work around your schedule, providing both part-time and full-time positions, along with a competitive wage.

Our company, which has been in operation since 1978, is located between Dublin and Delaware, Ohio and is approximately 30 minutes north of The Ohio State University. We specialize in container-grown perennials, herbs, ornamental grasses, groundcovers, and annuals consisting of over 750 different plants across 185 genera. During 2007 we served over 455 customers within a 7-state area. We produce over one million finished plants annually in facilities that include 78 greenhouses covering 190,000 square feet. In addition, our central conservatory area houses our Propagation Department that produces 500,000 starter plants per year. We are also equipped with a 3,200 square foot automated Production Facility with two transplanting lines to maximize efficiency in our plant production.

Interns rotate through each of department at the nursery and gain experience in each of the following areas:

Perennial Departments

- Work with the department managers to maintain plant quality
- Read order sheets and choose high-quality plant material for shipment to our customers
- Assist in plant production
- Learn plant and pest identification
- Learn plant culture and habit

Herb Department

- Work with the department manager to maintain plant quality
- Read order sheets and choose high quality plant material for shipment to our customers
- Learn plant and pest identification
- Learn herb usage, habits, and culture

Propagation

- Work with the Propagation manager to learn the most suitable technique for the propagation of perennials, herbs, and ornamental grasses
- Gain experience working with Unrooted Cuttings
- Learn plant and pest identification

Production

- Learn proper methods of plant preparation and handling
- Learn appropriate planting techniques for various plants

Shipping

- Assist in picking up orders, cleaning of plants, and loading of shipping racks
- Check for proper labelling
- Check for pests and diseases
